

Goff Capital Expands Aerospace Investments with Acquisition of World's Largest Hydrogen Embrittlement Testing Laboratory

Goff Capital acquires Omega Research, an engineering and testing laboratory serving metal finishing and processing industry with focus on aircraft and aerospace

FORT WORTH, TEXAS, USA, January 16, 2018 /EINPresswire.com/ -- Goff Capital announced today

“

As the aerospace super-cycle continues to attract investors, our priorities remain uniqueness of capability, criticality of function and premier quality. Omega Research has all these traits.”

John C. Goff, founder & Chairman of Goff Capital

the acquisition of Omega Research, Inc. (Omega Research), an engineering and testing laboratory serving the metal finishing and processing industry with special emphasis toward aircraft and aerospace related plating processes. Formed in 1984, Omega Research is the world's largest hydrogen embrittlement testing laboratory. The company also provides a wide-range of test services and materials-related consulting utilizing proprietary testing methods, controls and innovative equipment design to maximize the accuracy of results.

Omega Research services drive safety for the industry and yield to the customer. The company is NADCAP & A2LA

accredited. Also, Omega Research is an approved vendor on a long list of original equipment manufacturers (OEMs). The Omega Research operations relocated to a substantially larger and purpose-built facility in Euless, Texas as of Monday January 18th.

Omega's Chief Engineer and founder, W. Craig Willan, P.E., will remain with the company.

“I am pleased to be part of a company transition to new and energetic individuals guided by the business acumen of John Goff. John brings a rich history of investing in established technologies while at the same time nurturing the development of new ideas,” Willan said.

Through other investments, Goff Capital has prior experience serving the aerospace industry.

“Our team is excited to work with Craig, who built this business, to expand capacity, scope and customer-focused services” said John C. Goff, founder & Chairman of Goff Capital. “As the aerospace super-cycle continues to attract investors, our priorities remain uniqueness of capability, criticality of function and premier quality. Omega Research has all these traits alongside an impressive roster of customer relationships from small, privately-owned plating houses to the largest of OEMs.”
