

Distributed Energy Generation Market 2018–By Identifying the Key Market Segments Poised for Strong Growth in Future

Distributed Energy Generation Market 2018 - Identify Opportunities and Challenges

PUNE , INDIA, February 12, 2018 /EINPresswire.com/ -- Report Scope:

The scope of this investigation includes all major viable DG technologies as well as an abbreviated assessment of potentially viable and emerging DG technologies. Research analyzes each technology, determines its current market status, examines its impact on future markets and presents forecasts of growth over the next five years. Technological issues, including the latest trends, and the industries current and projected regulatory environment are assessed and discussed.

Research analyzes the global industry from both a manufacturing and an implementation point of view and examines government roles including regulatory support and requirements, feed-in tariffs and promotional incentives for various DG technologies. The report reviews the most relevant DG technologies, discusses recent trends in capacity installation and unit sales, and provides industry overviews and market assessments for each technology.

Estimated market values presented in the market chapter are based on manufacturers' total revenues. Projected and forecasted revenue values are in constant U.S. dollars unadjusted for inflation.

Key Players

AEOLOS WIND TURBINE
ALM Turbine
ANSALDO TURBEC
ASIAN PHOENIX RESOURCES LTD.
BALLARD POWER SYSTEMS INC.
Bergey WindPower Co.
BLADON JETS
BLOOM ENERGY
CANADIAN SOLAR INC.
Canyon Industries
Capstone Turbine International Inc.
Cargo & Kraft Turbin Sverige AB
Caterpillar
Cellkraft
Conergy
Conergy Renewable Energy Singapore Pte Ltd.
Cummins Brazil

Report Includes:

- An overview of the global market for [distributed energy generation](#).

- Analyses of global market trends, with data from 2015 and 2016, and projections of compound annual growth rates (CAGRs) through 2021.
- Evaluation of the existing distributed energy generation industry, focusing on producers of each major viable technology and their market potential over the next five years.
- Information on energy-related issues effecting the environment, including greenhouse gas (GHG) emissions, climate change, energy cost and security, air and water pollution, and other factors.
- Analysis of the market's dynamics, including growth drivers, inhibitors, and opportunities.
- A look at how regulatory environments are impacting the market.
- Profiles of major players in the distributed energy generation industry.
