

Drug delivery therapies shift from the clinical setting to the home

BOSTON, USA, February 19, 2018 /EINPresswire.com/ -- In the run up to the 5th Annual [Pre-Filled Syringes East Coast Conference](#) (11 – 12 April, Boston, US), SMi Group caught up with Debbie McConnell and Annie Diorio-Blum from Battelle to discuss common industry hurdles and opportunities within Pre-Filled Syringes.

Here is the snap shot from their comprehensive interview and the full version is available on the Download Centre of the Pre-Filled Syringes East Coast Conference website <http://www.pfsamericas.com/ein>

Pre-Filled Syringes East Coast
11 - 12 April 2018, Boston, MA, USA
Interactive Workshop 10th April
presented by Debbie McConnell and Annie Diorio-Blum, Battelle
Design Considerations for the World Outside the Clinic

Q: What do you see as the greatest challenge for the PFS industry to overcome at the moment?

A: As the movement to shift drug delivery therapies from the clinical setting to the home intensifies, the PFS industry faces new design challenges related to delivering drug in a safe and predictable manner by patients, and their caregivers, in the home.

Debbie McConnell and Annie Diorio-Blum will be hosting an Interactive Workshop during the SMi's Pre-Filled Syringes East Coast Conference: Design Considerations for the World Outside the Clinic – April 10th - where they will debunk key myths regarding what the PFS industry knows when it comes to user needs. An then provide participants with the insights and skills they need to collect user needs and convert them into design requirements using a methodical, repeatable approach.

Another Workshop on April 10th - Human Factors for Connected Drug Delivery Systems - will be hosted by Cambridge Consultants.

SMi Group works closely with our notable panel of speakers to build a programme tailored towards helping our attendees secure global success for their PFS device.

This year at the Pre-Filled Syringes East Coast Conference you will hear exclusive talks surrounding PFS regulation, syringe filling of high-concentration monoclonal antibody formulations, combination product development, safety evaluation of leachables, implementing quality by design (QbD) principles, human factor studies, smart labelling solutions, digitally connected devices + much more!
