

First Annual NVMe Developer Days Helps Designers Create Lightning-Fast Storage

The event focuses on applications that take advantage of NVMe's high throughput, familiar interface, and widespread support.

SANTA CLARA, CA, UNITED STATES, February 20, 2018 /EINPresswire.com/ -- Conference ConCepts, producer of the industry-leading Flash Memory Summit (FMS), announces the first annual NVMe Developer Days. The inaugural event occurs on December 5-6 at the Hilton San Diego Bayfront in San Diego, CA. The event focuses on applications that take advantage of NVMe's high throughput, familiar interface, and widespread support. Attendees will gain invaluable insight into designing storage based on the high-speed NVMe and NVMe-oF standards. Relevant applications include enterprise storage, high-performance computing, clouds, hyperconverged systems and megawebsites, computers, communications, embedded systems, mobile, and mil/aero. The event's program features keynotes, annual updates, paper and panel sessions, and an expert table session.

"NVMe has emerged rapidly as the leading solution for high-speed storage," says Conference Chairperson Mike Heumann, Managing Director at market research firm G2M Communications, "It offers high throughput, a well-maintained standard, a familiar interface (based on the popular PCIe), networking (via NVMe-oF), and a large supporting ecosystem." G2M Communications predicts that the NVMe market will soar to over \$60 billion by 2021. Their research also forecasts that over 50% of enterprise servers will be NVMe-enabled by 2019.

NVMe Developer Days offers table exhibits and founding sponsorships for companies and organizations wanting to take leadership positions in this fast-emerging market.

About Conference ConCepts:

Founded in 1994, Conference ConCepts (CCC) is a full-service professional management company that focuses on cutting-edge computer and communications technologies. CCC produces the popular Flash Memory Summit, now in its 13th year as the leading event on non-volatile memory. Other popular CCC events have been the AdvancedTCA Summit, Network Processors Conference, Open Server Summit, and Ethernet Technology Summit. CCC is known for providing high-quality events that offer valuable insight to technical professionals.
