

Alternative Reality Global Market 2018: Key Players Alibaba, Baidu, Facebook, Qualcomm

Alternative Reality Global Market Segmentation and key Players Analysis 2022

PUNE , INDIA, March 13, 2018 /EINPresswire.com/ -- Summary

[Alternative reality](#) - which encompasses virtual reality (VR), augmented reality (AR) and mixed reality (MR) - could become the next big computing platform. In VR, the user is immersed in an entirely artificial world. In AR, the user sees the real world overlaid with digital data. In MR, the user sees virtual objects integrated into the real world.

In Q1 2017, 2.3 million VR/AR headsets were shipped, an increase of 70% from the same period a year ago, according to IDC. Of these, 98% were VR headsets and the remaining 2% AR. Yet, AR is where much of the action is likely to be over the next two to five years. Imagine wearing a pair of glasses with the computing power and functionality of your smartphone, activated by your voice, which recognizes what you see, where you are and the context in which you require information. Imagine shopping for food and seeing price comparisons and nutritional information instantly appear in front of your eyes.

Activision Blizzard

Alibaba

Alphabet

Amazon

Ambarella

AMD

Apple
Autodesk
Baidu
Dassault Systemes
Electronic Arts
Facebook
Himax
HTC
Intel
Largan
Microsoft
Netflix
Nvidia
NXP
Panasonic
Qualcomm
Samsung Electronics
Sony
STMicroelectronics
Tencent
Texas Instruments
Time Warner
Vuzix

Scope

- This report is part of our ecosystem of thematic investment research reports, supported by our “thematic engine”.
- About our Thematic Research Ecosystem
- research has developed a unique thematic methodology for valuing technology, media and telecom companies based on their relative strength in the big investment themes that are impacting their industry. Whilst most investment research is underpinned by backwards looking company valuation models, thematic methodology identifies which companies are best placed to succeed in a future filled with multiple disruptive threats. To do this, tracks the performance of the top 600 technology, media and telecom stocks against the 50 most important themes driving their earnings, generating 30,000 thematic scores. The algorithms in “thematic engine” help to clearly identify the winners and losers within the TMT sector. Our 600 TMT stocks are categorised into 18 sectors. Each sector scorecard has a thematic screen, a risk screen and a valuation screen. Our thematic research ecosystem has a three-tiered reporting structure: single theme, multi-theme and sector scorecard. This report is a Single Theme report, offering in-depth research into a specific theme. It identifies winners and losers based on technology leadership, market position and other factors.

Reasons to buy

- Our thematic investment research product, supported by our thematic engine, is aimed at senior (C-Suite) executives in the corporate world as well as institutional investors.
- Corporations: Helps CEOs in all industries understand the disruptive threats to their competitive landscape
- Investors: Helps fund managers focus their time on the most interesting investment opportunities in global TMT.
- Our unique differentiator, compared to all our rival thematic research houses, is that our thematic engine has a proven track record of predicting winners and losers.
