

# Venous Thromboembolism Market Trends, Overview, Sales, Share, Revenue Status & Forecast to 2026

---

PUNE, MAHARASHTRA, INDIA, April 6, 2018 /EINPresswire.com/ -- Venous Thromboembolism

## Summary

Venous thromboembolism (VTE), which is composed of deep vein thrombosis (DVT) and pulmonary embolism (PE), is a blood clot (thrombosis) of the circulatory system that leads to impeded blood flow, which can have serious consequences in affected individuals. VTE can occur at any age, but it is more common in adults ages 60 years and older and is very rare in children. VTE events are highly dangerous and are associated with high rates of mortality and morbidity.

## Report Highlights

Epidemiologists forecast an increase in the diagnosed incident cases of VTE in the seven major markets (7MM: US, France, Germany, Italy, Spain, UK, and Japan), from 896,377 cases in 2016 to 1,071,438 in 2026, at an Annual Growth Rate (AGR) of 1.95%. The number of VTE attacks is forecast to grow from 1,020,991 in 2016 to 1,224,696 in 2026 in the 7MM. Epidemiologists have identified the predominant drivers of this market to be changes in country-specific incidence and procedure rates, as well as in the underlying demographic trends.

Epidemiologists forecast the prevalent cases of VTE in the 7MM from 2016-2026 using nationally-representative, country-specific studies published in peer-reviewed journals that provided the age- and sex-specific incidence of VTE, DVT, and PE in the 7MM. Additionally, they forecast the number of VTE attacks, medically ill discharges at risk of VTE, knee and hip replacements, recurrent VTE cases at one and 10 years, and VTE cases with cancer as comorbidity. Epidemiologists ensured that the forecast methodology was consistent across all the 7MM to allow for a meaningful comparison of the diagnosed incident cases of VTE across these markets.

## Scope of the Report

- The Venous Thromboembolism (VTE) EpiCast Report provides an overview of the risk factors and global trends of VTE in the 7MM (US, France, Germany, Italy, Spain, UK, and Japan). It includes a 10-year epidemiology forecast of diagnosed incident cases of VTE, deep vein thrombosis, and pulmonary embolism segmented by sex and age (in five-year increments beginning at ages zero to four years and ending at 85 years and older) in these seven markets. Additionally, this report includes the number of VTE attacks, medically ill discharges at risk of VTE, primary total knee and hip replacements, recurrent VTE cases after one and 10 years, and diagnosed VTE cases with cancer as comorbidity.
- The VTE epidemiology report is written and developed by Masters- and PhD-level

epidemiologists.

- The EpiCast Report is in-depth, high quality, transparent and market-driven, providing expert analysis of disease trends in the 7MM.

## Table of Contents

1 Table of Contents	
1 Table of Contents 2	
1.1 List of Tables 3	
1.2 List of Figures 3	
2 Venous Thromboembolism: Executive Summary 4	
2.1 Related Reports 6	
2.2 Upcoming Related Reports 6	
3 Introduction 7	
3.1 Disease Background 7	
3.2 Risk Factors and Comorbidities 8	
3.3 Global and Historical Trends 9	
3.4 Forecast Methodology 11	
3.4.1 Sources 11	
3.4.2 Forecast Assumptions and Methods 13	
3.5 Epidemiological Forecast for VTE (2016-2026) 24	
3.5.1 Diagnosed Incident Cases of Pulmonary Embolism 24	
3.5.2 Diagnosed Incident Cases of Deep Vein Thrombosis 25	
3.5.3 Diagnosed Incident Cases of VTE 26	
3.5.4 Age-Specific Diagnosed Incident Cases of VTE 28	
3.5.5 Sex-Specific Diagnosed Incident Cases of VTE 29	
3.5.6 One- and 10-Year First Time Recurrent Cases of VTE 29	
3.5.7 Number of VTE Cases with Cancer as Comorbidity 30
