

#MetaHash Partners with Ian Balina and 100X Advisors

Leading Crypto Influencer Ian Balina and 100X Advisors Have Officially Signed Strategic Partnership with #MetaHash that Includes Advisory and Coins Acquisition

ZUG, SWITZERLAND, August 10, 2018 /EINPresswire.com/ -- [#MetaHash](#), a MultiPoS consensus blockchain and decentralized real-time application platform, is happy to announce the signing of a strategic partnership with [Ian Balina](#) – one of the most influential blockchain and cryptocurrency investors and a prominent advisor and evangelist – and [100X Advisors](#), a full-service blockchain advisory firm.

MH_Balina

Ian Balina and the 100X Advisors team will support #MetaHash in furthering its growth and development, as well as expansion around the globe in key markets of the Americas, Europe and Asia. The strategic partnership includes the acquisition of #MetaHashCoins (#MHC) by Ian Balina and 100X Advisors from the Round A allocation.

“Almost every day, new projects are emerging in the blockchain industry, but as everyone knows – all that glitters is not gold. So when choosing partners, thorough and careful consideration is key,” said Ian Balina, general partner of 100X Advisors. “The technologies developed by #MetaHash are impressive. They already have a MainNet launched and are ready to deploy decentralized applications (dApps) and initial coin offerings (ICOs) on their platform. We are excited to partner with #MetaHash and help take it to the moon and beyond!”

Ian Balina is a well-known crypto leader and a regular crypto spokesperson for The Wall Street Journal, Forbes, CNBC, Huffington Post, The Street, Inc. and Entrepreneur Magazine for his work in analytics, cryptocurrencies and business activity.

“Throughout the years, Ian has commercialized and supported many groundbreaking digital services and e-businesses across the globe. Moreover, he is an acclaimed innovator and a highly-experienced crypto economist,” said Anton Agranovsky, co-founder of #MetaHash. “We believe blockchain technology has transformative capabilities and application benefits across multiple industry sectors and we are already witnessing how blockchain can change the way people engage, consume and spend.”

With the opening of its MainNet on June 29, 2018, #MetaHash started distributing #MHC prior to its upcoming start of forging initiatives. In comparison to mining, forging does not require sophisticated hardware, thus making it more accessible to consumers. The protection of the network consensus arrives from the value of the network native coins, which can be easily utilized to rent any common web-server; even a home PC with good internet connection can be

used.

Owners of #MHC will become the first nodes contributing into the network's growth and enjoying the full advantages of the early forging, scheduled for the third quarter of 2018.

About #MetaHash

#MetaHash is a blockchain-based digital asset exchange network and decentralized real-time application platform. The versatile network utilizes artificial intelligence (AI) to synchronize cross-continental nodes to create an optimal map of the network, based on latency rates. The technology then redistributes the data accordingly, harnessing the full power of the entire network, enabling unprecedented processing speeds capable of five billion transactions per day, at no more than three seconds for approval of each transaction.

The platform, based on its unique #TraceChain protocol, offers unparalleled speed, security, and decentralization at the lowest price per transaction in the history of blockchains. Signaling the future of the distributed web, #MetaHash is among the pioneers of blockchain interoperability, allowing networks to interact and integrate with each other.

#MetaHash is proud to be partnered with such well-known legal, regulatory, and tax advisors as KPMG AG, Wenger & Vieli AG, Sadis & Goldberg LLP, etc.
