

Allergy diagnostics market is anticipated to grow with a CAGR of 15% from the year 2018 to 2023

The Americas registered the largest share for the Allergy Diagnostics Market in 2017

HYDERABAD, TELANGANA, INDIA, August 10, 2018 /EINPresswire.com/ -- According to the new market research report by IndustryARC titled "[Allergy Diagnostics Market](#): By Allergy Type (Allergies: Food, Seasonal, Drug, Others); Diagnostic Test Type (In Vivo Test, In Vitro Test, Others); Product Type (Assays, Consumables, Others); End Users (Diagnostic & Research Institutes, Others) –Forecast (2018-2023)", the market will register faster growth due to the high incidence of allergic diseases.

The Americas Will Continue to Lead the Market Share and Growth During 2018-2023.

The Americas registered the largest share for the Allergy Diagnostics Market in 2017. These are projected to register the largest revenue during the forecast period. The growth is attributed due to increase in health-care expenditure in this region. Also, the Americas are projected to register the fastest growth rate with the highest CAGR through 2023, followed by Asia-pacific and Europe.

Asia-pacific and Europe are also estimated to register significant growth all through the coming five years. The growing population in Asia-Pacific is the major factor that gives rise to the demand for the Allergy Diagnosis in this region.

Selected/Sample Analysis Done in the Full Report:

Allergy testing is used among various end-user segments like hospitals, diagnostic centers and research institutes. The hospital segment is set to register a higher growth due to the high incidence of various allergic diseases such as skin allergy, blood allergy and others, which in turn results in the demand for and growth of the Allergy Diagnostics Market. Research institutes are also expected to register faster growth. This is due to increase in the demand for research on Allergic Diseases from various institutes across the globe.
