

IT Governance USA's NIST Pocket Guide now available to pre-order

NEW YORK, NEW YORK, USA, August 21, 2018

/EINPresswire.com/ -- IT Governance USA's [NIST](#)

[Cybersecurity Framework - A Pocket Guide](#) is now available to pre-order at an introductory price with 10% off.

[The NIST \(National Institute of Standards and Technology\)](#)

CSF (Cybersecurity Framework) is a voluntary framework primarily intended for critical infrastructure organizations to manage and mitigate cybersecurity risk based on existing standards, guidelines, and practices. However, the CSF has proven to be flexible enough to also be implemented by non-U.S. and non-critical infrastructure organizations.

It is crucial for all organizations, no matter size or industry, to protect themselves from a cyber attack. Having a solid cybersecurity strategy in place not only helps protect your organization, but also helps keep your business running in the event of a successful cyber attack. IT Governance USA's new pocket guide will help you gain a clear understanding of the CSF.

This pocket guide will teach your organization how to:

- Adapt the CSF for organizations of any size
- Establish an entirely new cybersecurity program, improve an existing one, or simply review your cybersecurity practices
- Break down the CSF and understand how other frameworks, such as [ISO 27001](#) and ISO 22301, can integrate into your cybersecurity framework

"Protecting your organization from the devastating impact of a cyberattack is paramount," said Alan Calder, founder

and executive chairman of IT Governance. "IT Governance USA's new NIST-based pocket guide will help you tailor your CSF to your organization's needs to help you manage cybersecurity threats effectively and efficiently."

The guide is available in Adobe eBook, ePub or softcover format for \$13.45 if ordered before its September 20 release.

NOTES TO EDITORS

IT Governance USA is the single-source provider of books, tools, training, and consultancy for IT governance, risk management, and compliance. It is a leading authority on data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background, and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East, and Asia. More information is available at www.itgovernanceusa.com.
