PUNE, INDIA, February 12, 2019
/EINPresswire.com/ --

Acne, also known as acne vulgaris, is a long-term skin disease that occurs when hair follicles are clogged with dead skin cells and oil from the skin.

US is Expected to Retain Largest Market Share. North America is

expected to dominate the market owing to a rising awareness and the growing population of teenagers as well as the growing healthcare expenditure in the region. It is one of the most common disorders in the United States and affects a large section of teenagers and young adults including primarily the female patient's population. Factors such as lifestyle changes, awareness programs regarding acne, and easy availability of acne treatments drive this market in this region. Apart from this, Asia-Pacific is expected to grow at a higher rate compared to other regions, due to a largely diversified patient pool including a major section of the population in the young adults age-group as well as the rising healthcare infrastructure.

In 2018, the global [Acne Therapeutics](#) market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
