## Description

Global Organic Pesticides Market is accounted for \$1,15,171.20 million in 2017 and is expected to reach \$4,41,401.57 million by 2026 growing at a CAGR of 16.1% during the forecast period. Some of the key factors propelling the market growth are increasing demand for food and organic food, ongoing greater utilization of pesticides, due to significant advancements in pest management procedures and technology, and favourable governmental policies. Furthermore, reduction of farmers land and adoption of genetically modified crops create demand for synthetic organics in the market. However, the presence of multiple end users leading to difficulty in managing inventory & distribution costs, and growth in the sale of spurious pesticides hamper market growth. Organic pesticides allow the farmers to control pest and diseases in plants without resorting to conventional pesticides. These pesticides can be much more easily decomposed by the environment as compared to chemical pesticides.

Based on product, natural segment is projected to be the growing segment due to the increase in awareness about the benefits of using organic products across the globe. And there are many types of natural pesticides which are not products of chemical engineering and return to the earth with less impact and reduced danger. By geography, the Asia Pacific provides potential growth opportunities due to the rise in awareness and governmental policies that encourage about the uses and benefits of organic pesticides in this region.

Some of the key players in Organic Pesticides market include Bayer Cropscience, Arysta LifeScience, Dow AgroSciences, Certis USA, BASF, DuPont, Futureco Bioscience, Andermatt Biocontrol Ag, Mark Organics, Syngenta, Bioworks, Valent BioSciences, Monsanto, Nufarm, Koppert, ADAMA, Stoller, Parry America, and Sikko Industries.
