Consumer goods are bought for consumption by the average consumer and are also acknowledged as final goods. They are the results of manufacturing and production, and what consumers consider seeing on the store shelf. They are tangible goods, purchased for direct consumption in order to satisfy human needs. They are classified into convenience products, specialty products, shopping products, and unsought products. Of these, convenience products experience the maximum demand as they are bought regularly by the consumers.

If you have any special requirements, please let us know and we will offer you the report as you want.

Food items consumed at food service outlets such as cafes, theatres, airports, hotels, restaurant’s, and others fall in the food service category. The food service segment offers the advantages of convenience and enhanced taste. The foodservice industry operates amid the challenges of keeping up with ever increasing consumer demands while maintaining profit and keeping costs down. Urbanization and western influence, especially in the emerging economies has paved the way for the expansion of the food service segment. The number of fine dine, casual dining, and quick service restaurants have witnessed a steep surge in the recent years. Additionally, home delivery and take away have also gained popularity. Both the food retail and food service segments are influenced by various key considerations which include location, cost, sales and marketing strategies, profit management and human resource management.
