Furthermore, the report also includes remarkable strategic developments of the market such as new product launches, agreements, partnerships, acquisitions & mergers, research & development collaborations & joint ventures, and growth of most significant market players on a global and regional basis.

A cable conduit, also called electrical conduit, is a tube used to protect and route electrical wiring. These tubes made of plastic, fiber or metal are designed to carry wires and cables. These conduit systems are preferred over the traditional wiring systems as they are advantageous in many ways such as they are much simpler and safer compared to their traditional counterparts, permits easier and frequent alterations and even provides protection to the wires in damp and hazardous conditions. The global cable conduit market was valued at USD 4.24 billion in 2018 and is estimated to reach USD 8.40 billion by 2025 growing at a CAGR of 10.26% during the forecast period

Growth by Region

North America is leading the market, with United States being the dominator, owing to stringent regulations and rules which are enforced in the respective sectors. The usage of conduit systems, especially, in the industrial manufacturing sector and the residential as well as the construction projects have been the major contributors for the conduit systems market in North America. Asia-Pacific is supposed to have the highest growth rate during the forecast period, the major contributing factor being the robust infrastructural development and urbanization. The European markets are currently experiencing a slow growth period but are expected to turnaround the market conditions with the rapid expansion of related sectors and promising industrial growth.
