## Key Players

The Thyroid Gland Disorder Treatment market report incorporates the profiles of well-known companies as well as the emerging players active in the market. In this way, the market implies the ongoing trends in the manufacturing landscape, and consequently, the market is precisely probed over its competitive scenario.

Thyroid gland, or Thyroid, is an endocrine gland in the neck that secretes hormones which are responsible for controlling the metabolic rate and protein synthesis. The global thyroid disorder treatment market is estimated to grow at a rate of 3.37% CAGR from 1951.5 million USD in 2018 to 2461.11 million USD by 2025.

## Growth by Region

North America will be the fastest growing market during the forecasted period. After North America, Europe, Asia-Pacific, Latin America are likely to follow.

## Drivers vs. Constraints

Major factor leading to the growth of market is the growing number of patients suffering from thyroid and the increasing awareness about their treatments. Increase in the number of patients will ultimately lead to the growth in the anti-thyroid drugs market.

## Industry Structure and Updates

- Lobectomy appeared to be safe and reliable first-line treatment for patients with contralateral non-suspicious thyroid nodules and small, low-risk papillary thyroid carcinoma.
- The use of lenvatinib among adults appeared relatively effective, but adverse events are common and should be monitored.
- July 2018 - IBSA Group established a commercial presence in the United States and is planning to directly distribute Tirosint capsules.
- July 2018 - Lobectomy is as good as removal of complete thyroid glands for people with early thyroid cancer.
