Regional Overview

The Chinese market is witnessing a surge in demand for whole milk powder. The trend of having coffee topped up with cream and the increasing demand for bakery products is driving the market. The population explosion of the past decade has also played a part in this demand growth. The market will expand further as demand for easily transportable instant milk increases. The growth may also be attributed to technological factors such as the increase in the protein content of the milk powder.

Industry News

The Global Whole Milk Powder is expected to reach \$12.6 Billion by the end of 2022. The increase in wholesale prices of the whole milk powder is being experienced globally. China is already purchasing whole milk powder along with other dairy products from foreign countries to meet its demand. Dairy farmers from countries such as New Zealand are selling their milk powder at a mark-up to China. The USA is also ramping up its production to meet its demand both locally and export purposes.
