

# Ficolo and Elmo Have Signed an Agreement on Providing Data Center Services in Tampere

*Data center and cloud delivery company Ficolo and ICT service provider Elmo have agreed on producing data center services for Elmo.*

HELSINKI , FINLAND, May 12, 2020

/EINPresswire.com/ -- Data center and cloud delivery company [Ficolo](#) and ICT service provider [Elmo](#) have agreed on producing data center services for

Elmo. With this agreement the data center services are delivered from Ficolo's data center, The Deck, located at the heart of Tampere city center.

The Deck data center is situated in the Tampere city center at the center of the growing Tampere business region. The ISO 27001 certified data center offers a great location near a growing user base especially for companies in Tampere region.

With this agreement Elmo can utilize the experience of a knowledgeable data center provider and strengthen their own organization's efforts closer to users' and customers' needs. As Ficolo is concentrating entirely on data center and cloud delivery services, it can offer customers optimized server space, utilizing the latest innovations in cooling, fire extinguishing and other technical solutions, and provide cost effective, fully redundant and secure data center services. Ficolo's certified operating processes include ensuring business continuity and continual improvement.

Elmo has been thriving the past years and has grown from a local operator to a nation-wide innovator in the ICT -market. Elmo's key strategy is to be the most customer-oriented ICT provider, thus operating a data center was a task well suited for a specialized partner. In the end it was an easy decision to transfer to a service provided by Ficolo.

"With the help of Ficolo's modern and scalable service platform Elmo can meet more specific customer needs. Elmo professionals can focus on customer solutions while Ficolo takes care of data center infrastructure and developing and operating the platforms. We can offer our customers more secure and efficient ICT services with Ficolo's help "explains Elmo CEO Janne Aaltonen.

Ficolo's strategy in recent years has been a strong growth which has included company acquisitions as well as new investments. Ficolo is the largest Finnish-owned company in data center business and one of the leading operators in Finland.

"Consolidation is the trend in the data center market. For a single company it is rarely worthwhile to invest in for example a standards fulfilling and redundant cooling system and power distribution or expertise in data center knowledge. There are growing companies in Tampere who are looking for data center in the vicinity. Ficolo's data center and cloud delivery services are available locally from The Deck also in the future" says Ficolo CEO Seppo Ihalainen.
