. In order to fulfill the demands of the skills in the industry, employers are looking to increase the hiring of skilled and certified employees.

. Besides, the companies are looking to impart the existing employees with cyber security training and certification programs in various courses such as – [CISSP training](#), CEH training, CISO certification training and others, to meet their organizational goals and requirements.

Director's Dialogue on the current Cyber-security Need & Mitigation

Speaking on the ups and downs of Cyber security professionals, Mehar Ahluwalia, Founder & Director - Mercury Solutions recently said, "Working-from-home is the new normal during these pandemic times and is going to be so till the first quarter of 2021 more or less, organizations amid this crisis are losing on revenues and reputations due to rising number of data breaches and cyber threats.

This is largely due to the gap in demand for skilled and certified cyber security experts in the industry and no adequate supply of trained professionals to handle the crisis." He further added, " We aim to provide our learners with the best quality cyber security training from industry leaders and expert-trainers.

We provide the most popular programs, like CISSP training, CEH training, CCISO training among
