

Eventene® Releases Version 3.5 with International Support

Eventene now works worldwide, with support for multiple languages, time zones, and payment processing in over 135 currencies.

SANTA MONICA, CALIFORNIA, USA,
November 26, 2020 /

EINPresswire.com/ -- SANTA MONICA,
California- November 25, 2020 – Every

day, countless organizations plan events across the globe. With the release of version 3.5, Eventene can now service the event planning needs of 45% of the world's population with its support for multiple languages, time zones, and ability to process payments during event registration in over 135 currencies.

Event Planners

Eventene now supports multiple languages, including English, French, German and Portuguese. During online event registrations, participants can select their preferred language and receive confirmation emails in their own language. The system remembers their language preference for future sessions. Event organizers benefit too, as the entire Eventene planning system has been localized.

International events require payments in different currencies, and Eventene now supports 135+ currencies, including the US Dollar, Euro, British Pound, and Swiss Franc. Additionally, all European payments automatically utilize Secure Customer Authentication (SCA), a new European regulatory requirement that reduces fraud and makes online payments more secure.

"Our vision from the start was to build a global event management system, with integrated support for multiple languages, local date/time formats, time zones, and international phone and address formats. These international features are especially needed for Virtual Events, where participants can join online from anywhere." said David Wood, CEO. "Now that we have made the investment to fully localize Eventene, it will be easier to add more languages as our customers request them."

At the onset of the COVID-19 pandemic earlier this year, Eventene quickly adapted to support Virtual Events by integrating popular video conferencing services, including Zoom, Google® Meet, and Microsoft® Teams. All countries need the ability to plan and host Virtual Events, and Eventene can now serve their needs with improved international support.

About

Eventene provides an All-in-one Event Management System for event organizers and activity directors in small-medium businesses, organizations, and associations. Eventene's platform optimizes planning for a wide variety of Events types, including virtual or in-person, public or private, and paid or free.
