Bathrooms are Dangerous. Falls are the leading-cause of fatal and non-fatal injuries for older Americans. Falls threaten seniors' safety, independence and generate enormous economic and personal-costs. Falls, with or without injury, carry a heavy quality-of-life impact. Older adults fear falling and, as a result, limit their activities and social-engagements. This can result in further physical decline, depression, social isolation, and feelings of helplessness.

One of the main reasons people move into an Assisted-Living-Center, or Nursing Home, is because bathing at home safely is an issue. According to the U.S. Centers for Disease Control and Prevention:

- One-in-four Americans aged 65+ falls each year.
- Every 11 seconds, an older adult is treated in the emergency room for a fall.
- Falls are the leading cause of fatal injury. Every 19 minutes, an older adult dies from a fall.
- Falls result in more than 2.8 million injuries treated in Emergency Departments annually.
- Falls also include over 850,000 hospitalizations and more than 30,000 deaths.
