

Anblicks Hosting a Webinar on Config Driven Framework for Talend

Low code Enterprise ETL/ELT Framework powered by Talend, to accelerate development, reduce maintenance costs, and simplify operations.

ADDISON, TX, UNITED STATES, July 6, 2021 /EINPresswire.com/ -- Anblicks will be hosting its latest webinar titled "[Anblicks Config Driven Framework \(CDF\) for Talend](#)" on July 13, 2021. The webinar will be presented by Simon Swan (Expert Solutions Engineer, Talend), Karthikeyan Jaganathan (Data Architect, BI & Integration, Anblicks) and Abhishek Kunduru (Chief Data Architect, Anblicks).

Anblicks Config Driven Framework (CDF) is a simplified low code ETL framework, which helps you to add new data sources and data integration pipelines nearly automatically, requiring little or no input from developers. CDF improves performance by configurable task parallelization and provides insightful proactive operational dashboards to mitigate failures. CDF is powered by [Talend Data Fabric](#), which combines data integration, integrity, and governance in a single, unified platform.

During the webinar, the presenters will walk you through the data integration use cases of two large customers and the challenges, showcasing how Talend Data Fabric and Anblicks CDF addresses these challenges, demonstrate the features such as configurable workflow, advanced monitoring and logging using the Power BI dashboard, explain the scalable and extensible architecture and showcase what it takes to implement and roll-out this low cost and high-performance solution.

"Anblicks Config Driven Framework tool enables organizations to accelerate the development of Talend jobs and increase developer productivity. This potentially saves up to 60% of the time and 40% of costs for the enterprise customers" - says Abhishek Kunduru, Chief Data Architect at Anblicks.

The banner features the Anblicks logo (Your Digital Transformation Partner), the DF logo (Anblicks Config Driven Framework Powered by Talend), and the Talend logo. A red circle in the top right corner says "WEBINAR". The main title is "Anblicks Config Driven Framework for Talend". The date and time are "13th July, 2021 Tuesday" and "10:00 AM (CST)". Below the title, there is a "Speakers" section with three circular portraits and their names and titles: Simon Swan (Expert Solutions Engineer, Talend), Abhishek Kunduru (Chief Data Architect, Anblicks), and Karthikeyan Jaganathan (Data Architect, Anblicks). At the bottom, the Anblicks logo is displayed with the tagline "Your Digital Transformation Partner".

Anblicks CDF tool enables organizations to accelerate the development of Talend jobs and increase developer productivity. This saves up to 60% of the time and 40% of costs for the enterprise customers”

Abishek Kunduru, Chief Data Architect at Anblicks

“Talend Data Fabric provides a unified environment, from discovery and ingestion to integrating data from multiple sources, to cleansing that data and ensuring its integrity, to ultimately analyzing and sharing trusted data with stakeholders. Talend's extensive partner network is an integral part of its ecosystem. We are glad to support Anblicks, our Gold partner, in promoting their CDF accelerator to bring business benefits to our global customers” - says Kris Cobb, Strategic Channel Manager at Talend.
