

Breast Pumps Market Growth Is Largely Due To The Increase In Women's Employment Rate

The Business Research Company's Breast Pumps Global Market Report 2021: COVID-19 Growth And Change

LONDON, GREATER LONDON , UK, July 23, 2021 /EINPresswire.com/ -- An increase in the global women's employment rate is contributing to the growth of the [breast pumps market](#).

There has been visual progress in terms of employment opportunities for women in recent years. According to monthly data published by the Bureau

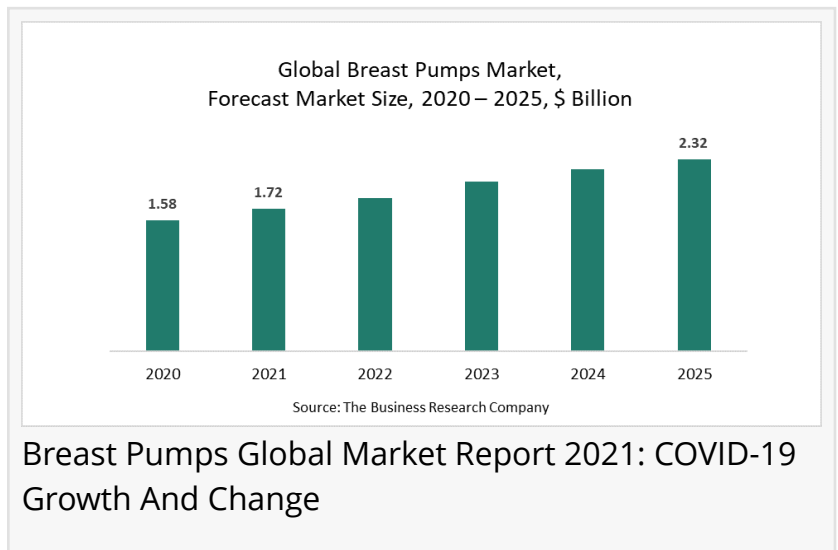

of Labor Statistics (BLS), an estimated 76.24 million women were on payrolls in December 2019—that's 109,000 more women than men. At the end of 2019, women made up to 50.04% of all those on payrolls. Breast pumps offer a convenient option for employed women to continue breastfeeding their babies while still at work. Therefore, the increasing global women's employment rate added to the growth of the breast pumps market.

The global breast pump market size is expected to grow from \$1.58 billion in 2020 to \$1.72 billion in 2021 at a compound annual growth rate (CAGR) of 9.1%. The growth in the breast pumps market is mainly due to the increasing awareness about the benefits and importance of breastfeeding, as breast milk is safe and still considered the best way to give babies the required nutrients and an immune boost. The market is expected to reach \$2.32 billion in 2025 at a CAGR of 7.76%.

North America was the largest region in the breast pumps market in 2020. Asia Pacific region is anticipated to record the fastest growth over the forecast period. The regions covered in the breast pumps market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.
