

## Global Breast Cancer Drugs Market Trends, Strategies, And Opportunities In The Breast Cancer Drugs Market 2021-2030

The Business Research Company's Breast Cancer Drugs Global Market Report 2021: COVID 19 Impact and Recovery to 2030

LONDON, GREATER LONDON, UK, September 20, 2021 / EINPresswire.com/ -- According to the new market research report '<u>Breast</u> <u>Cancer Drugs Global Market Report</u> 2021: COVID-19 Impact And Recovery'

published by The Business Research Company, the breast cancer drugs market is expected to grow from \$14.25 billion in 2020 to \$14.82 billion in 2021 at a compound annual growth rate (CAGR) of 4%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$19.49 billion in 2025 at a CAGR of 7.1%. The increasing prevalence of breast cancer is driving the breast cancer drugs market.

The breast cancer drugs market consists of sales of breast cancer drugs and related services. This industry includes establishments that produce drugs used in chemotherapy, surgery and radio therapy for treating breast cancer.

## Trends In The Global Breast Cancer Drugs Market

Manufacturers of breast cancer drugs are increasingly collaborating or partnering with other companies to share technology, resources, product knowledge and expand business. For instance, in March 2019, Astrazeneca entered into a partnership deal worth \$6.9 billion for the development of a breast cancer drug. According to the deal, the companies will jointly develop the drug trastuzumab deruxtecan and will share development and commercialization costs for the drug worldwide. Novartis collaborated with IBM Watson Health for the development of a solution that can determine drug combinations and sequences for best patient outcomes.
