

# What Is Driving The High Growth Of The Smart Washing Machines Market?

*The Business Research Company's Smart Washing Machines Global Market Report 2021 - COVID 19 Growth And Change*

LONDON, GREATER LONDON, UK,  
September 25, 2021 /

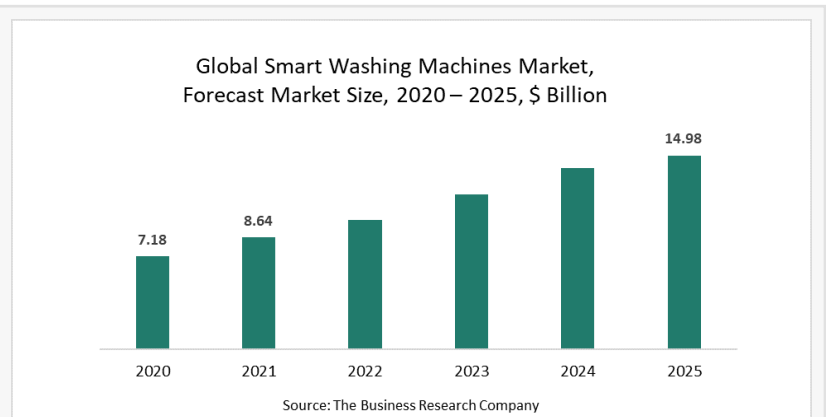

EINPresswire.com/ -- The increasing need for energy-efficient washing machines will drive the growth of the smart washing machines market in the forecast period. The smart washing machine industry is increasingly producing energy-efficient products to reduce carbon footprint and enable energy savings for the consumers. The rise of energy-efficient washing machines can be attributed to the stringent government regulations on electric home machines and advances in technology. According to the U.S. Energy Information Administration (EIA), the demand for global energy will grow by 37% due to a rise in energy requirements per household by 2035. Energy-efficient machines are designed to utilize minimum energy to complete the required task. Currently, over 80 countries have standards and labels for energy-efficient machines.

The [global smart washing machines market size](https://www.thebusinessresearchcompany.com/report/smart-washing-machines-market-global-report-2020-30-covid-19-growth-and-change) is expected to grow from \$7.18 billion in 2020 to \$8.64 billion in 2021 at a compound annual growth rate (CAGR) of 20.3%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$14.98 billion in 2025 at a CAGR of 15%.
