

Quality Nutrients Combat Vitamin Deficiency at Prime IV – The District (South Jordan, UT)

Prime IV Hydration and Wellness of The District offers intravenous nutrient drips to help overcome vitamin deficiencies.

SOUTH JORDAN, UTAH, UNITED STATES, October 15, 2021 /EINPresswire.com/ -- According to many studies, the vast majority (92%) of Americans have at least one vitamin deficiency. While oral supplements can help, most people do not realize that there is a much faster way to solve this problem. Prime IV Hydration and Wellness of St George offers intravenous nutrient drips to help overcome vitamin deficiencies.

“IV drips offer 100% absorption of essential vitamins and minerals,” said Alex Cannon, owner of Prime IV The District. “Increasing these levels is usually a painstakingly long process, but with Prime IV top-of-the-line drips, patients are feeling better in under an hour.”

“

Increasing these levels is usually a painstakingly long process, but with our top-of-the-line drips, you can be feeling better in under an hour.”

Alex Cannon, owner of Prime IV The District

The following are a handful of nutrients that we offer to combat deficiencies:

B-Complex

Deficiency Symptoms:

- Weakness, Tiredness, Lightheadedness
- Constipation, Diarrhea, Loss of Appetite

Found in the following IV drips:

The Revitalizer, The Summit, The Jetsetter, The After Party, The Skinny Drip, The Weekend Warrior, The Myers' Cocktail, The Glow, The Champion, The Resurrection, & The Immunity Armor

Facts:

These essential vitamins are Vitamin B-1 (Thiamine), B-2 (Riboflavin), B-3 (Niacin), B-5 (Pantothenic Acid), B-6 (pyridoxine), Vitamin B-9 (Folate) and B-12 (Cobalamin).

Each element of the [B-Complex vitamin](#) has its own specific duty within the body, yet it is when they function as a whole that the B-Complex vitamin truly helps the body to remain healthy and balanced. Research study has shown that the B-Complex vitamin can be very helpful in reducing the signs of stress and anxiety. As B vitamins are water-soluble, it is important that a sufficient amount of these vitamins is taken each day.

[Calcium](#)

Deficiency Symptoms:

- Numbness, Tingling Fingers, Muscle Cramps
- Mental Confusion, Lethargy, Loss of Appetite

Found in the following IV drips:

The Myers Cocktail Drip

Facts:

The District

Overcome daytime fatigue, boost immune system

Calcium is the most common mineral found in the body and is required for the formation of bones and for bodily functions like muscle contractions and blood clotting. Calcium also plays a role in cardiovascular function and muscle movement.

Calcium shortage can weaken the bones, especially in older individuals. The body stores more than 99% of its calcium in the bones and teeth to help keep them strong. In addition to building bones and keeping them healthy, calcium helps our nerves send messages for muscle contraction. Unfortunately, our bodies cannot produce new calcium. The exact amount of calcium you need depends on your age and other factors.

Glutathione

Deficiency Symptoms:

- Headaches, Dizziness, Lethargy
- Joint Pain, Rashes, Dry Skin
- Sleep Disorders, Depression

Found in the following IV drips:

The Glow Drip, The Immunity Armor & The Resurrection

Facts:

Glutathione, also known as the “Mother of All Antioxidants”, is a substance that is made up of three amino acids existing in almost every cell in the body. Glutathione is a molecule made up of three protein building blocks, cysteine, glutamine, and glycine. The presence of glutathione helps maintain the normal function of the immune system, thus promoting the body’s overall health. Scientific evidence was found stating the significant role of glutathione in the multiplication of lymphocytes, the cells that mediate specific immunity.

The body manufactures glutathione in a variety of ways. In the event that these amino acids are depleted, the body can use foods like lean proteins such as chicken, fish, and nuts among others to boost your body’s reserves.
