

# Smart Traffic Camera Market worth swell to \$32.34 Billion by 2030, Explore Report

*increase in implementation of thermal imaging traffic cameras to detect high body temperature of people travelling on roads is propelling the growth of market*

PORTLAND, OR, UNITED STATES, October 15, 2021 /EINPresswire.com/ -- Smart traffic camera is an artificial intelligence-enabled camera that helps the traffic department to control traffic dynamically with enhanced feature of real-time data capture and processing. In addition, it helps the traffic department to manage the traffic flow along with increasing the safety of people.

smart traffic camera market

The growth of the [global smart traffic camera market](#) is driven by increase in concerns related to public safety and rise in number of vehicles and insufficient infrastructure. In addition, development of smart cities is anticipated to positively impact the growth of the market. However, factors such as high expenses associated with equipment installation and security threats & hacker challenges are expected to hamper the market growth. On the contrary, increase in penetration of analytics software is expected to offer remunerative opportunities for the expansion of the market during the forecast period.

According to a recent report published by Allied Market Research, titled, "Smart Traffic Camera Market by Component, Application, Deployment Model and Camera Type: Global Opportunity Analysis and Industry Forecast, 2021–2030,"The global smart traffic camera market size was valued at \$8.36 billion in 2020, and is projected to reach \$32.34 billion by 2030, registering a CAGR of 14.6% from 2021 to 2030.

Depending on deployment model, the smart traffic camera market is bifurcated into traffic

monitoring and traffic enforcement, the traffic monitoring segment garnered the share, and is expected to grow in the upcoming years, owing to growing need for improving safety and security on the roads. In addition, with the advent of connected vehicle technology, smart traffic cameras will be able to directly control vehicles to prevent accidents with pedestrians or other vehicles, which, in turn, is anticipated to foster the growth of the market.

On the basis of region, the Asia-Pacific dominated the smart traffic camera market share in 2020, and is expected to maintain its dominance in the upcoming years, owing to surge in need to monitor red light violations and speed offences. In addition, improvements in the traffic infrastructure in developing nations for motion analysis and face recognition, and transmitting the video data as well as the extraction of the video information via a network for further analysis drive the growth of the market in Asia-Pacific region.

With alarming increase in COVID-19 patients, various governments have implemented lockdown, which significantly reduced the number of vehicles on roads, which, in turn, increased the number of accidents in some areas, owing to over speeding on empty roads, thus driving the need to install smart traffic cameras to detect these drivers and prevent more such accidents. Furthermore, owing to increase in incidents of over speeding during the pandemic, organizations are innovating smart traffic cameras, which would detect traffic patterns and make on-the-spot decisions to control traffic flow. For example, if a large group of children approached the intersection, they would be given right of way, or if an elderly pedestrian is walking slowly over a pedestrian crossing, he or she would be given extra time. Thus, number of such development across the globe are anticipated to provide lucrative opportunity for the expansion of the smart traffic camera market.

The report focuses on the growth prospects, restraints, and trends of global smart traffic camera market analysis. The study provides Porter's five forces analysis to understand the impact of various factors such as bargaining power of suppliers, competitive intensity of competitors, threat of new entrants, threat of substitutes, and bargaining power of buyers on global smart traffic camera market.

#### Key Findings Of The Study

- By component, the hardware segment accounted for the smart traffic camera market share in 2020.
- By application, the surveillance and traffic management segment generated the highest revenue in 2020.

The key players operating in the global smart traffic camera industry include Allied Vision, Axis Communications, E-Com Systems, Jenoptik, Flir Systems, Hikvision, Tattile, Imperx, Inc, Teledyne Dalsa, Siemens AG, Idemia, Motorola Solutions, Redflex Holdings, Sensys Gatso Group Ab, and Vitronic GmbH. These players have adopted various strategies to increase their market

penetration and strengthen their foothold in the smart traffic camera industry.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP, based in Portland, Oregon. AMR provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains.

AMR launched its user-based online library of reports and company profiles, Avenue. An e-access library is accessible from any device, anywhere, and at any time for entrepreneurs, stakeholders, and researchers, and students at universities. With reports on more than 60,000 niche markets with data comprising of 600,000 pages along with company profiles on more than 12,000 firms, Avenue offers access to the entire repository of information through subscriptions. A hassle-free solution to clients' requirements is complemented with analyst support and customization requests.
