According to IMARC Group's latest report, titled "[Power Rental Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)". The global power rental market exhibited moderate growth during 2015-2020. Power rental services offer temporary electricity supply for construction purposes, mine excavation projects, oil and gas exploration activities, etc. Some of the most common types of power rental solutions available are welding generators, diesel or gas generators, mobile lighting towers, distribution boards, and cables. These solutions offer reliability, flexibility, speed, and cost-effectiveness to businesses for coping with brief shortages of power. Owing to these benefits, power rental services find extensive applications across diverse industries, such as construction, mining, oil & gas, etc.

The escalating demand for continuous and uninterrupted power supply for various critical application areas, including data centers, nuclear power plants, hospitals, fire stations, etc., is currently driving the market for power rentals. Furthermore, the introduction of several favorable government initiatives to expand airport and metro networks, along with the growing construction of retail infrastructures, is also catalyzing the demand for power rental solutions. Various other factors, including the increasing adoption of natural gas-based power generators and the rising utilization of renewable energy as an alternative source of power to minimize carbon emissions, are projected to further bolster the demand for power rental services across the globe in the coming years. Looking forward, IMARC Group expects the market to grow at a CAGR of around 6% during 2021-2026.
