Impact of COVID-19 on Distributed Cloud System Market:

1. Companies are suddenly having to enable an increasingly mobile workforce. Rife with technical ramifications and considerations, the notion of remote work has emerged a necessity, requiring businesses to consider.

2. Leaders of multiple organizations think it is very important to have a consistent operational experience between the edge and public and private clouds. But the data shows there are

tremendous obstacles preventing that, mostly around establishing secure and reliable connections between providers, trying to navigate different support and consulting processes, and having to work with various platform services and this issue can be addressed with the help of distributed cloud systems. Hence, the COVID-19 have surely create huge opportunities for the distributed cloud system market in the upcoming years.
