

Protective Films Market Size, Growth Opportunities, Company Profile Analysis Report 2022-2028 - DataM Intelligence

Protective Films Market size is projected to reach USD 27 billion by 2028, with growth at a CAGR of 6.5% during the forecast period 2022 to 2028

CLEVELAND, OHIO, USA, January 28, 2022 /EINPresswire.com/ -- Protective Films Market Overview:

According to the research report published by DataM Intelligence, the Protective Films Market size is

projected to reach USD 27 billion by 2028, with growth at a CAGR of 6.5% during the forecast period 2022-2028. Due to remarkable development in the building and construction industry in growing countries such as China, India, & Indonesia, is the main factor for increasing demand for the protective films market in the Asia Pacific region. The rise of protective films is because to the upsurge in numerous industries such as packaging, transportation, building and construction, automotive, among other industries.

“

Polyethylene-type Protective Films have a major share of over 25% in the global market, and the Automotive Segment is predicted to show the utmost CAGR of 11% in the Global Protective Films Market.”

DataM Intelligence

Protective films are manufactured with plastic intentionally for the sake of covering surfaces. These protective films safe the covered upper part from damages such as scratches, corrosion, water spillage, and vermin attack. These films are used in the transportation industry, automotive industry, and electronics industry. The Protective films market growth is primarily attributed to the development in the industries where protective films

have large-scale applications.

Protective Films Market Growth Drivers:

Protective films depend on polymers such as polyvinyl chloride, propylene, polyethylene, and among others, these are the most commonly used products which are reflected sun rays, protect from changes in weather need a protective barrier to keep safe the product from possible damages, these elements will raise the demand for the protective films market.

Global protective films market demand is also compelled by its wide use in industrial and construction undertakings, particularly in emerging countries. Similarly, the fast-developing demand for smartphones has comprehensively contributed to the protective films market growth.

Mainstream the demand for protective films is witnessed from Asia-Pacific due to important growth in the building and construction industry in developing countries such as India, China, and Indonesia. The growth of the protective films market is owed to the rise in different industries such as packaging, building and construction, automotive, transportation among others, which find the application of protective films.

Protective Films Industry Opportunities:

The growing implementation of innovative technologies for making protective films with resistance to environmental conditions, superior properties, and long-lasting films are projected to deliver profitable opportunities for growing the market throughout the forecast period. The large usage of electronic devices over the globe in several applications and the increasing demand from customers to safeguard their electronic products from damages, scratches, dust, and other situations are providing opportunities for the global protective films industry.

Protective Films Market Segmentation Analysis:

According to the research report the market for Protective film is segmented By Type, By Materials, By Thickness, By Coatings, By Application, By Texture, and By End User.

The market segment is subdivided into the following;

By Type (Adhesive-Coated, Self-Adhesive), By Material (Polyvinyl Chloride (PVC), Polyethylene (PE), Polypropylene (PP), Polyurethane (PU), Polyamide (PA), Polyethylene Terephthalate (PET), Paper, Others), By Coating (Smooth and Glossy Surfaces, Aluminum, Chromium, Metal pre-coated, Paint, Matt and grained surfaces, Others), By Thickness (0-2 MM, 2-4 MM, 4-6 MM, 6-8 MM, 8-10 MM, More Than 10 MM), By Texture (Opaque, Transparent, Glossy, Matte, Others), By Application (Metals, Glass, Textiles, Woods, Marbles, Molded Plastic, Others), By End-User (Automotive (Passenger Car, Bus and Truck, Others), Building & Construction (Residential,

Commercial, Industrial, Infrastructure), Electronics, Healthcare, Aerospace, Industrial, Marine, Packaging, Others),

Segment Insights:

Polyethylene-type protective films have a major market share of over 25% in the global market owing to their easy obtainability, and they are low-cost amongst all the others.

The automotive segment is predictable to knowledge the utmost CAGR of 11% during the forecast period in the global Protective Films Industry, due to the growing demand for electric vehicles in the global.

Geographical Classification:

The Global Market is geographically classified into North America, Asia Pacific, Latin America, Europe, the Middle East, Arica, and the Rest of the world.

Regional Growth Insights:

Asia Pacific Protective Films Market is Controlling the Global Market:

In 2020, the Asia Pacific has gained control over the global protective films market. This region will remain the largest market for automation production and consumption. Minimal labor expenses, grown transportation things, and obtainability of raw materials motivate auto-makers to construct new factories in Asia pacific region, which eventually leads to demand for paint protection films.

North America Protective Films Market is predicted to show a CAGR of over 6.5% during the forecast period. Positive government rules and regulations, developed manufacturing industry, the existence of multinational original equipment manufacturers, are also estimated to push product acquisition in the coming years.

Europe's Protective films market was valued at USD 65 million in 2020 because of the heavy production volume of passenger cars and airplanes. The developing defense budgets of economies such as the United Kingdom, Germany, and France and the growth of the electronics industry are projected to drive the regional market.

The Middle East and Africa market is projected to show gentle growth because of the occurrence of low developed countries and the absence of awareness. Though, the Middle East is projected to show in another way to the growth of the regional market because of economic strength.

Prominent Players Covered in the Global Market Report are:

Some of the major players profiled in the global market include; Pregis LLC, Saint-Gobain, Toray Industries, Inc., Kao-chia plastics co., Ltd, Mactac (a Subsidiary of Lintec Corporation), Covertec SRL, Dunmore, 3M, Nitto Denko Corporation, DuPont, Chargeurs, Arkema, Polifilm Group, Pelloplast Oy, Echotape and among others.
