

Nanocoatings Market Drivers, Restraints, Merger, Acquisition and Business Opportunities by 2027

Escalating demand for nanocoatings from the healthcare sector is one of the significant factors influencing the market growth.

VANCOUVER, BC, CANADA, February 22, 2022 /EINPresswire.com/ -- The global [nanocoatings market](#) is expected to reach USD 22.96 Billion by 2027, according to a new report by Emergen Research. The nanocoatings market is experiencing rapid growth attributed to its increasing demand in end-user industries such as healthcare, automotive, building & construction, electronics, marine, energy, water treatment, and packaging.

Emergen Research Logo

The surging demand for nanocoatings in the healthcare sector is projected to drive the growth of the market in the forecast period. Antimicrobial nanocoatings are essential for indwelling catheters possessing a high risk of microbial infection. Moreover, these are deployed in surgical instruments, bone replacement materials, and prosthetic devices. Also, biofilms of yeasts and oral bacteria may result in several localized ailments in the oral cavity, such as dental caries, oral thrush, periodontal disease, tooth root & pulp disease, and dental implant dental braces infections.

Market Overview:

The research report on the Nanocoatings market is formulated through extensive primary and secondary research along with qualitative and quantitative analysis of vital aspects of the market. The insightful data is further validated and verified by the industry professionals. The report strives to offer deeper insights into the overall market scenario of the Nanocoatings business sphere.

Key Highlights From The Report

By product, antimicrobial held the largest nanocoatings markets share in 2019 and is expected to grow at a rate of 18.0% in the forecast period. Antibacterial applications of nanocoatings are garnering importance to avert the disastrous impacts of antibiotic resistance. Nanocoatings may be used as diagnostics, preventives, drug carriers, and synergetic in the antimicrobial therapies.

By distribution channel, the online distribution channel is projected to grow at a faster rate of 20.9% in the period 2020-2027, as this mode of distribution has the advantage of providing a broader exposure to the product produced by the manufacturers, especially with the proliferation of smart devices and internet connectivity.

By industry vertical, the building & construction sector is likely to grow at a rate of 18.5% in the period 2020-2027. Nanocoatings are the thin film coatings of the nanoscale range that are implemented to protect the surface of numerous construction materials, such as glass, concrete, marble, steel, and sand limestone, among others. These coatings assist in protecting them from friction reduction, heat resistance, corrosion, and environmental influences, including algae, moss, water, and oil stains.

Key participants include Eikos Inc., Buhler Partec GmbH, Integran Technologies Inc., Bio-Gate AG, Nanofilm Ltd., Nanoveer Technologies LLC, Cima Nanotech Inc., P2i, Inframat Corporation, Nanophase Technologies Corporation, and Nanogate AG, among others.

Emergen Research has segmented the global nanocoatings market on the basis of product type, distribution channel, industry vertical, and region:

Product Type Outlook (Revenue, USD Billion; 2017-2027)

Antimicrobial

Anti-Fouling & Easy-to-Clean

Self-Cleaning

Anti-Fingerprints

Others

Distribution Channel Outlook (Revenue, USD Billion; 2017-2027)

Online

Offline

Industry Vertical Outlook (Revenue, USD Billion; 2017-2027)

Healthcare

Automotive

Building & Construction

Electronics

Marine

Energy

Water Treatment

Packaging

Others

Regional Outlook (Revenue, USD Billion; 2017-2027)

North America

S.

Canada

Europe

Germany

UK

France

BENELUX

Rest of Europe

Asia Pacific

China

Japan

South Korea

Rest of APAC

Latin America

Brazil

Rest of LATAM

MEA

Saudi Arabia

UAE

Rest of MEA
