Industry Trends

Presently, customers are looking for consistency and convenience and are also seeking nutritious food that can be accessed with ease, limiting waste creation and aligning with their personal brands. Nevertheless, consumer spending trends show that they are willing and ready to pay a premium price for food tech innovations that can meet their ever-increasing needs of health, convenience, and very little environmental impact. The opportunity for food innovators to take advantage of these factors is creating a huge demand for foodtech market. The growing emphasis by customers on sustainability and health has placed significant pressure on the food industry to innovate in terms of the application of technology.

The food players focus on traceability, sustainability, improving freshness and eliminating food waste. For instance, Farmdrop, a U.K.-based company, delivers fresh and sustainably sourced grocery in reusable packaging. At the same time, another food company, Full Harvests, is boosting the food supply chain to shop ugly by using surplus or imperfect produce that would have or else gone to waste. These initiatives by various market participants are rising application of foodtech in raw material procurement which is anticipated to positively impact the foodtech market growth.

Currently, foodtech is playing an increasingly critical role in how the food we eat is cultivated, packed, distributed, and how it tastes, smells, and repurposed and reused. Investments in food

tech can continue to increase to help deliver on the promise of healthier, more sustainable food systems for the world. The sudden outbreak of COVID-19 had a compelling impact on accelerating the adoption of food technologies throughout the value chain. Food producers are digitizing their production floors with robotics, eCommerce, and digital food-management tools to adjust to the new normal norms.

The food industry is tackling the impact of COVID-19 situation using food-tech tools towards transparent, sustainable, and efficient operations. New companies/entrants are taking advantage of the rising application of food-tech in the market to expand in the food industry. For instance, in July 2020, India-based company CureFit announced the launch of the ready-to-eat meal segment. The company strengthened its packaged food business to revive its food tech arm, EatFit, which was impacted by the Covid-19 outbreak. Thus, the foodtech market is gaining momentum and is expected to boost in the future years.
