

Woodworking Router Bits Market to Surpass US\$ 154.2 Mn, Registering 4.8% CAGR by 2029

NEWARK, NEWARK, UNITED STATES OF AMERICA, May 9, 2022

/EINPresswire.com/ -- According to a new research report published by Future Market Insights (FMI), the global [woodworking router bits market](#) is estimated to exhibit a CAGR of close to 4.8% during the forecast period of 2022-2029.

Router bits are used in several woodworking applications such as milling, drilling, grooving, profiling, engraving, carving, etc. High accuracy and precision of carbide-tipped router bits are giving them a competitive edge in the global market. High demand for design furniture is another plus point favoring market growth. Furthermore, high reselling value of carbide-tipped router bits as compared to high speed steel (HSS) is also expected to push the growth lever of the global market in the coming decade.

Woodworking Router Bits Market

Key Takeaways of Woodworking Router Bits Market Study

Woodworking router bits have prominent application in engraving and carving all kinds of wood such as chipboard, plywood, hardwood, and softwood, and play a crucial role in the furniture industry.

Targeting the expanding DIY consumer segment, manufacturers are offering customized products, which facilitate effective usage in handheld operations such as drilling, cutting, milling, etc.

The most common types of router bits available in the market are handheld router bits and CNC router bits. Handheld router bits are limited to specific applications, resulting in steady market growth, whereas, CNC router bits are versatile, providing lucrative business avenues for investors.

Out of all woodworking operations, grooving holds a significant share, and is projected to witness maximum growth during the forecast years.

In recent years, the market has witnessed price variations, owing to diversified product lines offered by manufacturers that target a broad clientele based on the type of woodworking operation.

Growing usage of wood in the design of basic utilities in commercial construction is expected to further raise the demand for woodworking router bits
