The m-commerce payment market consists of sales of m-commerce payments services by entities (organizations, sole traders, and partnerships) that involve buying and selling of goods and services online, through smartphones and tablets. M-commerce payments refer to the use of mobile phones and tablets in order to complete the transactions online on any purchase of online products or services. M-commerce payments are helpful as they provide convenience to the user and save time and effort.

[Global M-commerce Payment Market Trends](#)

The use of digital wallets is a key trend gaining popularity in the m-commerce payment market. Digital wallets are a software-based system that securely stores users' payment information and passwords for numerous payment methods and websites. By using a digital wallet, users can complete purchases easily and quickly.
