The intermediate bulk container (IBC) market consists of sales of the intermediate bulk containers by entities (organizations, sole traders, and partnerships) that refer to a pallet-mounted, industrial-grade reusable container that is used for storing and transporting bulk liquids, pastes, and solids. It is called intermediate due to its size which is bigger than a drum but smaller than a tank. The hard outer container is usually made from galvanized tubular steel or iron, while the inner containers are often made from plastic such as polyethylene or high-density polyethylene (HDPE).

Global Intermediate Bulk Container Market Trends

Technological advancement is a key trend gaining popularity in the intermediate bulk container market. According to the global intermediate bulk container market analysis, major companies are focused on developing a new technological solution to meet consumer demand and strengthen their position. For instance, in November 2020, Schoeller Allibert, a Netherlands-based producer of recyclable, reusable, and returnable plastic packaging solutions launched ChemiFlow based on corrosion-resistant technology. ChemiFlow is an UN-authorized
