First UK Authorized Dealer Signed for AI Robotics Leader: Artificial Intelligence Technology Solutions (Stock Symbol: AITX)

RENO, NEVADA, UNITED STATES, May 24, 2022 /EINPresswire.com/ -- First UK Authorized Dealer Signed for AI Robotics Leader: Artificial Intelligence Technology Solutions ([Stock Symbol: AITX](#))

Artificial Intelligence and [Robotic Solutions](#) for Multiple Applications.

Expanding Sales Including Expectation of Large Orders from Global Small Box Retailer and Casino Operators.

Collaboration with Nightingale Security to Complete Autonomous Air and Ground Security Solution.

New Multi-Unit Order from Renowned East Coast Private College.

“

This dealer has great a great reputation and tremendous clients that we expect will embrace RAD solutions”

Steve Reinharz, CEO of AITX

Security Robot Order Recently Received from New Dealer with Multiple Fortune 500 Business Relationships.

AITX announced that its wholly owned subsidiary Robotic Assistance Devices, Inc. (RAD) has signed its first authorized dealer in the United Kingdom and has received

an order for a ROSA security robot. Additional details, including the name of the new dealer will be released in the future.

“Market similarities between the UK and North America make our solutions a natural fit in that market,” said Mark Folmer, President of RAD. “I’ve had strong relationships with leaders in the UK’s security industry for years, and I’m thrilled that there will now be a qualified dealer bringing RAD solutions to this large and vibrant market.”

With the addition of the new authorized dealer, RAD’s dealer network has expanded to 40, covering the US, Canada, the United Kingdom, and the European Union.

“It’s important that we continue to build a global network of dedicated RAD dealers. This UK addition is a great step forward for RAD. Having a qualified base of dealers is essential as we aim to deliver tens of thousands of units in addition to innovative software solutions such as RAD Light My Way over the next many years,” said Steve Reinharz, CEO of AITX. “This dealer has great a great reputation and tremendous clients that we expect will embrace RAD solutions.”

Reinharz is returning from 2022 IFSEC International, Europe’s premier security trade show. “Companies throughout Europe are yearning for solutions that RAD offers, performance at a lower cost. They’re struggling with the same human resource issues soaring manpower costs that the US and Canada are experiencing. We will continue to build a base of qualified European dealers as we see that market almost the same size as the US,” Reinharz concluded. RAD’s parent company AITX intends to file for listing on the OTCQB within 10 days of filing its YE2022 10-K which is expected in May.

is a compact, self-contained, portable, security and communication solution that can be deployed in about 15 minutes. Like other RAD solutions, it only requires power as it includes all necessary communications hardware. ROSA’s AI-driven security analytics include human and vehicle detection, license plate recognition, responsive digital signage and audio messaging, and complete integration with RAD’s software suite notification and autonomous response library.

AITX Showcase

Two-way communication is optimized for cellular, including live video from ROSA's dual high-resolution, full-color, always-on cameras. RAD has published two Case Studies detailing how ROSA has helped eliminate instances of theft, trespassing and loitering at Car rental Locations and Construction Sites across the country.

Robotic Assistance Devices (RAD) is a high-tech start-up that delivers robotics and artificial intelligence-based solutions that empower organizations to gain new insight, solve complex security challenges, and fuel new business ideas at reduced costs. RAD developed its advanced security robot technology from the ground up including circuit board design, and base code development. This allows RAD to have complete control over all design elements, performance, quality, and the user's experience of all security robots whether SCOT™, ROSA™, Wally™, Wally HSO™, AVA™, ROAMEO™, or RAD Light My Way™. Read about how RAD is reinventing the security services industry by downloading the Autonomous Remote Services Industry Manifesto. AITX intends to file for listing on the OTCQB within 10 days of filing its YE2022 10-K which is expected in May.

About AITX:

Artificial Intelligence Technology Solutions (OTC: AITX) is an innovator in the delivery of artificial intelligence-based solutions that empower organizations to gain new insight, solve complex challenges and fuel new business ideas. Through its next-generation robotic product offerings, the AITX RAD, RAD-M and RAD-G companies help organizations streamline operations, increase ROI, and strengthen business.

AITX technology improves the simplicity and economics of patrolling and guard services and allows experienced personnel to focus on more strategic tasks. Customers augment the capabilities of existing staffs and gain higher levels of situational awareness, all at drastically reduced cost. AITX solutions are well suited for use in multiple industries such as enterprises, government, transportation, critical infrastructure, education, and healthcare.

Video presentations of AITX advancements in AI and Robotics are available via YouTube. Click here: <https://www.youtube.com/c/AITX-RAD/videos>.

AITX Subsidiary Robotic Assistance Devices Expects Large Orders from Global Small Box Retailer and Second Casino Operator

On April 29th AITX announced it is awaiting final approval from a pair of significant pending orders. These 2 orders are expected after months of in-person meetings, trade show visits, site walks, and being fully vetted by the clients. The retailer is expected to initially deploy 8 ROSAs as a pilot program at 2 of their locations.

RAD Light My Way from AITX recently won 2 Secure Campus 2022 Awards from Campus Security & Life Safety Magazine. In October RAD Light My Way along with RAD's ROSA won CBRE's 2021 Best Workplace Experience Solution Award.

ROSA is a compact, self-contained, portable, security and communication solution that can be deployed in about 15 minutes. Like other RAD solutions, it only requires power as it includes all necessary communications hardware. ROSA's AI-driven security analytics include human and vehicle detection, license plate recognition, responsive digital signage and audio messaging, and complete integration with RAD's software suite notification and autonomous response library. Two-way communication is optimized for cellular, including live video from ROSA's dual high-resolution, full-color, always-on cameras.

AITX Subsidiary Robotic Assistance Devices and Nightingale Security Announce Complete Autonomous Air and Ground Security Solution

On April 27th AITX announced it will offer special features to its ground-based security robots based on a collaboration with Nightingale Security. Nightingale Security develops fully autonomous, 24/7 physical security aerial drone systems equipped with real-time surveillance cameras & data gathering sensors.

The result of this development will be the security and facility management industry's first integration of an aerial drone which is capable of being autonomously deployed by a mobile or stationary security robot. Conversely the integrated system will also allow for RAD's mobile robot ROAMEO, and future RAD mobile solutions, to be dispatched by a Nightingale aerial drone. The companies confirmed that both organizations plan to offer the integrated solutions through their existing sales channels.

AITX Subsidiary Robotic Assistance Devices Receives Multiple ROSA Order from East Coast Private College

On April 20th AITX announced an order for 5 ROSA security robots from a renowned private college on the East Coast. AITX confirmed that this order has been received through one of RAD's largest authorized dealers. Details of the transaction have not been released due to non-disclosure agreements.

AITX also announced that the devices will be managed by RAD's forthcoming 'incident management system'. This cloud-based application advances RAD's goal of replacing the security industry's disparate and obsolete user software and is offered by RAD at no additional cost. More than a dozen universities and colleges are actively considering AITX RAD Light My Way, along with multiple RAD devices per location.

■Premier Protective Security Signed as New Dealer, Receives First Security Robot Order with Additional Units Expected

On March 14th AITX announced Premier Protective Security, Inc. as a new authorized dealer, and has received an order for a ROSA security robot from this new dealer. Premier Protective Security is a minority-owned security personnel management company with nationwide engagement.

Premier Protective Security has existing relationships with multiple Fortune 500 companies. The initial ROSA order will be utilized for their demonstration purposes to clients and prospects.

■RAD Light My Way' an Integrated Facility and Campus Safety Application

On March 10th AITX formally released RAD Light My Way, the first of its kind facility and campus safety solution where users can control the lighting and security conditions of their environment.

RAD Light My Way offers property management and campus security professionals a new and better way to address security. This breakthrough solution puts the power of security in the hands of employees, faculty, and students through the combination of affordable, smart, interactive technologies, a mobile app, and live remote monitoring and response services.
