The catalyst fertilizer market consists of sales of catalyst fertilizers by entities (organizations, sole traders, and partnerships) that are used to increase the rate of reaction in fertilizer production. Fertilizer is a natural or artificial substance containing chemical elements that enhance the growth of plants. The catalyst deployed in the fertilizer helps to speed up the rates of forward and backward reaction. Catalyst fertilizers make nutrients more available for plant uptake and utilization, helping to optimize yield potential and providing outstanding grower return on investment (ROI).

Strategic partnerships are the key trend gaining popularity in the catalyst fertilizer market. Major companies operating in the catalyst fertilizer sector are looking for partnerships to strengthen their position in the market. For instance, in March 2022, Casale SA, a Switzerland-based chemicals company, partnered with Ferkenesco Management Limited, an Uzbekistan-based investment holding company, and Enter Engineering Pte Ltd, a Singapore-based engineering services provider. The agreement represents the foundation for future cooperation between the three companies to support the construction of an ammonia-based fertilizer plant in Uzbekistan.
