

Global Passive Fire Protection Market Growth Trajectory

The Business Research Company's Passive Fire Protection Global Market Report 2022: Market Size, Trends, And Forecast To 2026

LONDON, GREATER LONDON, UK,
August 18, 2022 /EINPresswire.com/ --

As per The Business Research Company's "Passive Fire Protection Global Market Report 2022", the

[passive fire protection market share](#) is expected to grow from \$3.99 billion in 2021 to \$4.42 billion in 2022 at a compound annual growth rate (CAGR) of 10.9%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The passive fire protection industry growth is expected to reach \$5.73 billion in 2026 at a CAGR of 6.7%. The growing construction sector is driving the growth of the passive fire protection market.

Key Trends In The Passive Fire Protection Market

Technological advancement is a key trend gaining popularity in the passive fire protection market. Major companies operating in the passive fire protection sector are focused on developing technological solutions for passive fire protection to strengthen their position. For instance, in November 2020, Honeywell, a US-based company that mainly operates in building technologies launched new suite of Connected Life Safety Services (CLSS), a cloud platform for fire safety systems. The platform is intended to help fire professionals avoid downtime, demonstrate compliance, and shorten the time it takes to design, install, commission, inspect, maintain, and report life safety equipment.

[Passive Fire Protection Market Overview](#)

The passive fire protection market consists of sales of passive fire protection products by entities

(organizations, sole traders, and partnerships) that are integrated into the building structure for stability, as well as into the walls and floors to divide the building into manageable risk compartments. Passive fire prevention is a part of any fire safety system that prevents a fire from spreading by protecting firefighters and allowing inhabitants to flee.
