Global Household Insecticides Market Trends:

Household Insecticides Market

Insects represent one of the major causes of disease and discomfort across the globe. Insect-borne diseases, such as malaria, dengue and chikungunya, can impede the economic and social development of a country, especially in the warm and humid regions of the tropics and sub-tropics. Apart from this, local and national governing authorities in numerous countries are presently focusing on controlling insects, which in turn is strengthening the market growth. Furthermore, leading manufacturers in the industry are introducing new, safer and environment-friendly product variants to expand their existing market share. Moreover, advancements in insecticide release technology, such as sprays, aerosols, and gels, are anticipated to bolster the market growth in the coming years.
