

# Diabetic Foot Ulcers Market Size to reach US\$ 4,740.4 million By 2027 Growing at 7.1% CAGR | GlobalData Plc

LONDON, UK, November 24, 2022

[/EINPresswire.com/](https://www.einpresswire.com/) -- The global diabetic foot ulcers market size reached US\$ 4,740.4 million in 2021, according to a new report by GlobalData Plc. Diabetic foot ulcers are sores that occur on the feet of people with Type 1 Diabetes and Type 2 Diabetes. Symptoms include sores, ulcers, or blisters on the foot or lower leg, pain, walking with difficulty, discoloration in feet: black, blue, or red, cold feet and fever, skin redness or swelling, or other signs of infection. The predisposing factors include diabetic neuropathy, peripheral vascular disease, a foot deformity, and a history of tobacco use disorder.

View Report Outlook at: <https://www.globaldata.com/store/report/diabetic-foot-ulcers-market-analysis/>

According to a study published in September 2020 in NCBI, the annual incidence of diabetic foot ulcers globally is around 9.1 to 26.1 million. In their lifetime, 15% to 25% of people with diabetes mellitus will get a diabetic foot ulcer. The prevalence of diabetic foot ulcers will inevitably rise as more people are diagnosed with diabetes each year, which is expected to boost the market growth.
