

BBQ Charcoal Market Size to Boost US\$4.2 billion By 2027 | CAGR 6.6% - IndustryARC

The increase in number of household grill ownership on account of growing outdoor cooking will provide growth opportunities to BBQ Charcoal Market

HYDERABAD, TELANGANA, INDIA, December 8, 2022 /EINPresswire.com/

-- IndustryARC, in its latest report, predicts that The [BBQ Charcoal Market](#) size is estimated to reach US\$4.2

billion by 2027 after growing at a CAGR of 6.6% from 2022 to 2027. BBQ or barbeque charcoal is type of charcoal which is made from activated carbon

and is majorly used for cooking food, mostly meat items over a grill. The charcoal is of various types like lump charcoal, charcoal briquettes and coconut shell charcoal. Hence, as The charcoal is majorly used in cooking, so it finds high applicability in residential cooking as well as commercial cooking where it is used by end users like restaurants, hotels and caterers. Factors like setting up of new barbeque restaurants, increase in purchase of barbeque grills and growing consumption of meat items are likely to drive BBQ charcoal market growth. However, availability of substitutes like gas grilling will limit the usage of charcoal in grilling food items, which can hamper the growth of BBQ charcoal industry. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.
