Industrial cybersecurity refers to the practice of protecting industrial control systems (ICS) and other critical infrastructure from cyber threats. Industrial control systems are used to monitor and control the operations of critical infrastructure such as power grids, transportation systems, water treatment plants, and manufacturing facilities.

As these systems become increasingly connected to the internet and other networks, they become vulnerable to cyberattacks such as ransomware, phishing attacks, and distributed denial of service (DDoS) attacks. These attacks can result in operational disruptions, loss of data, financial losses, and even physical harm to people and the environment.
