

CentiMark Teams with Women And Drones & NPS-DDP.org to Support Denver East HS STEM Program

Recycling old technology to help benefit Youth STEM education as well as underfunded Public Safety agencies.

HEBRON, CT., 06248, September 6, 2023 /EINPresswire.com/ -- [CentiMark Corporation](https://www.CentiMarkCorporation.com), a renowned leader in roofing and flooring solutions with a strong national presence, has forged a dynamic partnership with [Women and Drones](https://www.WomenAndDrones.com) and the National Public Safety Drone Donation Program (NPS-DDP.org) to invigorate education and public safety. CentiMark proudly contributes a drone to Denver East High School's esteemed STEM education program.

[Denver East High School](https://www.DenverEastHighSchool.com), situated at 1600 City Park Esplanade, Denver CO 80205, stands at the forefront of propelling STEM education through its dedicated youth-focused robotics program. In synergy with Women and Drones, a catalyst for diversity in the drone industry, the school is collaborating with NPS-DDP.org to secure support. This initiative supplies vital drone technology to resource-constrained public safety agencies and repurposes aging drones for educational endeavors.

The initiative began on 12/29/2022 when Ariel Ruempolhamer, family and community coordinator at Denver East High School, submitted an application for a drone donation request to NPS-DDP.org, with the partnership of Women And Drones. This request found its place on NPS-DDP's interactive map, a hub for public safety and STEM education drone contributions. The overarching objective is to provide students immersive experiences with drone technology, cultivating knowledge in safety protocols and coding essentials and employment opportunities.

Donations helping to support STEM education and Public Safety

CentiMark Corporation's unwavering dedication to innovation and community upliftment serves as the cornerstone for this collaborative venture. With numerous strategic locations across the nation and a rich legacy, CentiMark epitomizes the spirit of progress by embracing cutting-edge methodologies, including drone technology.

The momentous drone donation, a testament to CentiMark Corporation's values, was orchestrated by a company representative (date pending). This altruistic gesture serves as a poignant embodiment of CentiMark's commitment to nurturing education and fostering innovative thinking.

Partnering to help STEM education receive free drone technology

Ariel Ruempolhamer's sentiments echo the anticipated impact: "A drone donation to East High School is synonymous with nurturing the scientists of tomorrow. Students will immerse themselves in a world of opportunities, simultaneously confronting biases and exploring the dimensions of drone technology. This donation will infuse safety awareness, comprehension of regulations, and proficiency in drone flight and coding."

“

We are tremendously excited and deeply grateful to witness companies like CentiMark actively contributing and donating to our mission of advancing STEM education and enhancing public safety.”

Mark Langley

"We at CentiMark are excited to donate our old drones to programs that matter such as the STEM programs and the NPS-DDP. As we grow and update our equipment we hope to continue to donate drones to these programs." Said Mr. Collicott, Drone Program Manager of the Western Group of CentiMark Corporation.

CentiMark's contribution not only advances STEM education but also fosters innovation, bearing testament to a profound commitment to sustainability. For further insights into CentiMark's pioneering initiatives and community engagement, visit the CentiMark Corporation Profile. Discover the essence of Women and Drones by exploring the Women and Drones Website

By contributing drones to this program, CentiMark not only furthers STEM education but also helps to shape the future of innovation and learning, while demonstrating their commitment to

sustainability and helping to repurpose older usable drones as opposed to adding them to electronic waste landfills
