

Kegr: Advancing Beer Enjoyment Through Innovative Technology

PORT WASHINGTON, NY, USA,

November 30, 2023 /

EINPresswire.com/ -- Kegr is set to introduce a novel beverage dispensing solution, bringing an upgrade to social gatherings and the way we enjoy drinks. The upcoming Kickstarter campaign in Q1 2024 aims to bring forth a product designed for convenience, control, and precision in serving your favorite drinks.

Kegr, a sophisticated device beyond a conventional keg tap, offers users a range of features poised to enhance the hosting experience, whether for a grand event or an impromptu BBQ with friends.

Key features of Kegr include:

“

We had the opportunity to use a Kegr tap for a local running event and it worked fantastic! It's so much easier to use and travel with for beer festivals too.”

Larry – Spider Bite Beer Co

1. Ease of Use: Operating with a single switch, Kegr simplifies the serving process, beating traditional kegerators. Its lightweight, portable design ensures easy transport, akin to a hand pump.
2. No CO2 Hoses and Clamps: Bid farewell to complex CO2 setups; Kegr effortlessly taps into any standard Sankey D keg.
3. Companion App: Monitor and control the keg through the Kegr Companion app, connecting via Bluetooth Low Energy technology. Receive notifications, track liquid levels, and manage the entire setup with ease.

the Kegr Companion app, connecting via Bluetooth Low Energy technology. Receive notifications, track liquid levels, and manage the entire setup with ease.

4. Customization: Adjust the pressure to match preferred beverages, whether a light and refreshing beer or a dark, intense, and bitter variety.

5. Iconic Design: Capturing the essence of backyard events, Kegr sports a red cup design, internal automatic pump, and a long-lasting rechargeable battery.

6. Precision and Performance: Engineered for longevity and reliability, Kegr features a chrome-plated forged brass connector, ensuring durability. Its rugged exterior and advanced technology guarantee a consistent and precise pour.

7. Compatibility: Designed to accommodate the widely used Sankey D coupler type in North America, Kegr ensures compatibility with a broad range of kegs.

Developed by a dedicated team passionate about technology, Kegr aims to bring innovation to beer enjoyment. The team has worked diligently to bring this product to life and is prepared to take it to the next level with the support of backers on Kickstarter.

Be part of the Kegr journey; support the campaign on Kickstarter launching in Q1 2024. Join in bringing this product to market and transforming the way beer is enjoyed. Stay tuned for updates on the journey to Kickstarter.

Mission Statement:

To advocate for the use of reusable kegs as an environmentally friendly alternative to disposable containers. By simplifying keg setup, we aim to make it the preferred choice for group beverage consumption.
