

Mastopexy Market is anticipated to surpass US\$2.293 billion by 2029 at a CAGR of 6.60%

The mastopexy market is anticipated to grow at a CAGR of 6.60% from US\$1.466 billion in 2022 to US\$2.293 billion by 2029.

NOIDA, UTTAR PARDESH, INDIA, May 30, 2024

/EINPresswire.com/ -- According to a new study

published by Knowledge Sourcing Intelligence, the [mastopexy market](#) is projected to grow at a CAGR of 6.60% between 2022 and 2029 to reach US\$2.293 billion by 2029.

The market's expansion can be ascribed to women's increasing desire for better physical appearance. High-tech tools have been introduced by the major market players to improve surgeries and ensure complete client satisfaction. Additionally, the demand for cosmetic breast augmentation procedures is rising as a result of the rise in [medical tourism](#) in some nations.

The growing number of older people is a main reason for the increasing size of the industry supplying mastopexies to people who wish to have their breasts lifted or made firmer; one problem that women face when they grow old

is that sometimes their breasts start sagging due to reasons such as gaining extra pounds and the forces of gravity acting upon them, resulting into insecurity and low self-esteem. A solution is provided by mastopexy procedures, which give the breasts a more lifted and youthful appearance. This can greatly increase a woman's self-esteem and a general feeling of well-being.

The mastopexy market, by technique, is divided into four types- crescent breast lift, Benelli lift, Benelli-lollipop lift, and full mastopexy. The major purpose of a full mastopexy procedure is to treat breast sagging, which is common in older women. It is also used to lessen the proliferation of breast tissues in patients with [breast cancer](#). To improve the patient's overall appearance, surgeons attempt to remove any extra or surplus tissue that surrounds the breast during this

surgical procedure. This process adds to the overall diversity of the Mastopexy market by being important in both medical and cosmetic contexts.

The mastopexy market, by tissue incision, is divided into three types- skin, adipose, and glandular. The online segment is anticipated to grow significantly during the forecast period. These tissue incisions remove excess skin from the breasts.

The mastopexy market, by end-users, is divided into three types- hospitals, clinics, and others. The demand for clinics is high as the number of cosmetic surgeons and practices offering breast enhancement surgeries is increasing as a result of the growing acceptance and awareness of these surgical procedures.

The North American region is expected to witness significant growth in the mastopexy market during the forecasted period. One of the most common cosmetic surgical procedures done in the area is breast augmentation. The most common reconstructive surgeries done each year are those to remove tumours, which include breast cancer and skin cancer, among others.

The research includes several key players from the mastopexy market, such as The Esthetic Clinics, Aurora Clinics, Mayo Clinic, Spire Healthcare, Bupa, The Karri Clinic, Pristyn Care, Ramsay Health Care, Aprassa, and Rebecca Ayers.

The market analytics report segments the mastopexy market using the following criteria:

- By Technique
 - o Crescent Breast Lift
 - o Benelli Lift
 - o Benelli-Lollipop Lift
 - o Full Mastopexy
- By Tissue Incision
 - o Skin
 - o Adipose
 - o Glandular
- By End-User
 - o Hospitals
 - o Clinics
 - o Others
- By Geography

- o North America

- United States
- Canada
- Mexico

- o South America

- Brazil
- Argentina
- Others

- o Europe

- United Kingdom
- Germany
- France
- Spain
- Others

- o Middle East and Africa

- Saudi Arabia
- UAE
- Israel
- Others

- o Asia Pacific

- Japan
- China
- India
- South Korea
- Indonesia
- Thailand
- Others

Companies Mentioned:

- The Esthetic Clinics
- Aurora Clinics
- Mayo Clinic

- Spire Healthcare
- Bupa
- The Karri Clinic
- Pristyn Care
- Ramsay Health Care
- Aprassa
- Rebecca Ayers
