Growth Driver Of The Minimally Invasive Surgery Market

The rising prevalence of cardiovascular diseases is expected to drive the minimally invasive surgery market growth. Cardiovascular disease (CVD) is a broad term that refers to a condition that affects the heart or blood vessels. It is often linked with the accumulation of fatty substances within the arteries (atherosclerosis) and an elevated risk of blood clots. In cardiovascular diseases treatment the minimally invasive surgeries are used to help in lowering the risk of complications, lowering blood loss, reducing risk of infection, and enhancing visualization.
