About Corc Yoga: Corc Yoga’s 100% non-toxic, sustainable, antimicrobial and hypoallergenic products are made with renewable, and biodegradable cork. According to the World Wildlife Fund, Portuguese cork forests remove 14 million tons of carbon from the atmosphere each year and they are biodiversity hotspots, essential to the protection of some of the world’s key plant and animal species.

The outer layer of cork is harvested every 9 to 12 years, contributing to the life and longevity of the tree. Naturally resistant to dust and bacteria, cork is ideal for those who suffer from allergies and asthma.

Minority and female-owned Corc Yoga works with family-owned cork producers and artisans in Portugal to create their renewable, all-natural mats, blocks, backpacks, massage balls, purses, and even dog mats. Together they made a commitment to follow the principles of sustainable practices, fair wages, zero waste, and giving back.
