

EON Tennessee Celebrates Grand Opening in Franklin, TN with Cutting-Edge EON® Fat Reduction Technology

Revolutionizing Fat Reduction with the World's First FDA-Cleared Robotic Touchless Laser Device

FRANKLIN, TN, UNITED STATES, April 16, 2025 /EINPresswire.com/ -- [EON Tennessee](#) is thrilled to announce its grand opening in Franklin, TN, bringing the revolutionary EON® body contouring treatments to the local community. As the world's first FDA-cleared robotic touchless laser device for subcutaneous fat reduction, EON® offers a cutting-edge solution for achieving your body goals with precision and comfort.

The [EON® laser technology](#) will allow EON Tennessee to offer patients in Franklin and the surrounding areas a non-invasive body contouring [treatment](#) that permanently eliminates fat cells without the downtime of a surgical procedure. EON® treatments are ideal for clients trying to target those stubborn areas of fat that diet and exercise cannot improve and have a high patient satisfaction rate.

EON Tennessee Announces Their Grand Opening In Franklin, TN

EON® is a 1064nm laser that's currently FDA-cleared for flanks, full abdomen, back, and thighs and is backed by years of research and industry-leading scientists and doctors. With its state-of-the-art robotic precision, EON® can simultaneously deliver laser energy and cooling for a more comfortable body contouring treatment experience without post-treatment care or downtime.

The device is designed with touchless, autonomous technology that maps the patient's topography for personalized treatments. It utilizes over 40 safety sensors for advanced patient safety, including skin proximity and temperature detection. EON® heats adipose tissue to a temperature of approximately 123.8° F, inducing cell death or apoptosis. The state-of-the-art jet impingement cooling system maintains the external skin temperature to around 103.1°F for a comfortable patient experience.

Who is a good candidate for EON®?

Anyone looking to permanently reduce stubborn fat in the upper / lower abdomen, flanks, back, or thighs.
People looking for a non-invasive solution for body sculpting that doesn't interrupt their normal daily schedule.
Manageable BMI of 30 or less
No contraindications and precautions acknowledged
People able to "pinch an inch" in the treatment area

EON Tennessee Announces The Revolutionary EON Device

Provider studies show that patients experienced a 21.6 - 25 percent average fat reduction after a single 60-minute abdominal treatment, while some people lost as much as 40 percent.
