Proton Pump Inhibitors Global Market Report 2025

The Proton Pump Inhibitors Global Market Report 2025 foresees market expansion, driven by an increase in the prevalence of gastroesophageal reflux disease and peptic ulcer disease, an upsurge in the aging population and changing lifestyle and dietary habits, and a rise in awareness and diagnosis. The market size of Proton Pump Inhibitors globally has been trending upwards, projected to increase from \$3.4 billion in 2024 to \$3.55 billion in 2025 at a CAGR of 4.2%.

Wondering About the Future [Growth of The Proton Pump Inhibitors market?](#)

According to The Business Research Company's latest report, the historic growth in the proton pump inhibitors market can be attributed to the prevalence of diseases such as GERD and peptic ulcer, increased awareness, diagnosis and the need for better treatment modalities. A noteworthy influence on this upward trend has been the steady increase in the number of *Helicobacter pylori* infections. *H. pylori*, a bacterium affecting the small intestine and stomach lining, is often treated with proton pump inhibitors in combination with other antibiotic therapies.
