“It’s not every day Rolex does something for the left-handed folks in the world,” Ron says. “But with the green ceramic dial and lefty crown layout, this watch leans in to the left-handed culture. Being left-handed can signal that one is a ‘creative,’ and owning a Rolex can signal that one is a highly successful person who leans into his left-handedness.”

Beyond commentary, the post reminds readers of the importance of servicing both modern and vintage Rolex watches.
