How Big Is The Global Agriculture Market Expected To Grow?

The global agriculture market is witnessing an unprecedented growth trajectory, fueled by various potent market trends and driving forces. According to the [Agricultural Global Market Report 2025](#), the agriculture market size has come a long way and has exhibited robust growth. It is projected to surge from \$14361.62 billion in 2024 to \$15502.69 billion in 2025, marking a compound annual growth rate CAGR of 7.9%. The growth experienced in the historic period can be ascribed to factors such as population growth, globalization of trade, government policies, crop protection products, climate and weather patterns, and rural development programs.

What Does The Projections Say About The Future Of Agriculture Market?

In the forthcoming years, the agriculture market is anticipated to maintain its strong growth pace. By 2029, it is estimated to expand to a staggering \$20637.4 billion, ushering in a CAGR of 7.4%. The expectant growth in the forecast period can be credited to the rise of sustainable agricultural practices, advancements in genetic engineering in crops, organic farming, vertical farming, and innovative water management solutions addressing global food security concerns. The forecast period will also see significant trends such as the adoption of precision agriculture

technologies, the integration of artificial intelligence in farming, digital marketplaces for agricultural products, utilization of autonomous farming equipment, and adoption of farm management software.

How Are Changing Consumer Preferences Impacting Global Agriculture?

The surge in health consciousness and shifting consumer preferences towards healthier and diverse diets is set to further stimulate [the growth of the agriculture market](#) in the future. Healthier, nutrient-rich diets and diverse food choices mean that smallholder farming households can improve the diversity and nutrient adequacy of the crops they cultivate. This not only enhances the demand for a broader variety of crops but also benefits farmers and augments the diversity of the crops grown in the agriculture sector.
