

CORE Construction Services of Florida Launches Future First Responders EMT Scholarship for Broward County Students

Fort Lauderdale-Based Contractor Donates \$10,000 to Fund EMT Training for Two Broward College Students, South Florida's Next Generation of First Responders

FORT LAUDERDALE, FL, UNITED STATES, August 8, 2025 /EINPresswire.com/ -- [CORE Construction](#) recently announced the launch of the Future First Responders EMT Scholarship. This new program will provide full funding for Emergency Medical Technician (EMT) training for two students annually at [Broward College](#). Made possible through a \$10,000 donation from CORE, the scholarship highlights the company's dedication to supporting the communities where it operates, builds, and resides.

CORE Construction presents a \$10,000 donation to Broward College to launch the Future First Responders EMT Scholarship, supporting local students in EMT training. Pictured with Fort Lauderdale Fire Rescue, Broward College, and this year's recipients.

The scholarship, developed in partnership with Broward College and [Fort Lauderdale Fire Rescue](#), is designed to help aspiring first responders enter the workforce without financial barriers. This initiative reflects CORE's broader philanthropic mission to strengthen local infrastructure not just through construction, but by empowering the people and professions at the heart of South Florida communities. The program will continue each school year, building a pipeline of skilled, local EMTs and a stronger, safer Broward County.

"At CORE Construction, building stronger communities goes far beyond the structures we create," said Cody Kiess, President of CORE Construction Services of Florida. "By funding EMT training at Broward College, we're helping the next generation of first responders get the education they need to serve, protect, and keep our neighborhoods safe. Supporting their journey is one way we can make a lasting impact in the communities we're proud to call home."

Representatives from Broward College and Fort Lauderdale Fire Rescue applauded the partnership, noting the critical need for well-trained EMTs in the region. "Broward College is dedicated to being the number one destination for academic excellence, and that's reflected in the quality of our programs in the health sciences, including EMTs," said Broward College President and CEO Torey Alston. "When our community partners join with Broward College to solve problems, removing financial barriers, our students and the community win."

CORE Construction is a nationally recognized general contractor specializing in K-12, higher education, civic, public safety, and healthcare projects with a focus on quality, safety, and building stronger communities.

"This isn't just about funding a class," said Kiess. "It's about helping young people in our community move forward. We're proud to build facilities that serve the public, but the real impact happens when you help someone take the first step into a career of service. That's what this scholarship is about."

“

By funding EMT training at Broward College, we're helping the next generation of first responders get the education they need to serve, protect, and keep our neighborhoods safe."
